PROFILE

Cloud & DevOps Engineer with hands-on experience in designing and deploying scalable cloud solutions using AWS. Transitioned from a postgraduate background in Geology into cloud computing, bringing strong analytical thinking and problem-solving skills.

Experienced in building real-world projects involving EC2, S3, Lambda, IAM, Auto Scaling, and CI/CD pipelines. Skilled in automation, infrastructure provisioning, and monitoring using modern DevOps practices.

PROFESSIONAL EXPERIENCE

GIS Engineer

07/2025 – 10/2025

LRYPT Technologies

Bengaluru

- Performed topographical and mapping and digitization for urban development and infrastructure by using ArcGIS Pro and Quantum GIS.
- Ensured data accuracy and quality control (QC) of GIS datasets, improving overall project delivery standards.

Junior GIS Analyst

01/2024 – 07/2025

Deduce Technologies

Bengaluru

Geographical Information System (GIS) by using this software analysing geographical survey of a particular city by mapping method.

COURSES

Cloud Computing and DevOps

11/2025 – 05/2026

Besant Technologies

Bengaluru

Completed **Cloud Computing, DevOps & Linux** training from Besant Technologies with hands-on experience in AWS, Docker, Kubernetes, Terraform, CI/CD, and Linux; built real-world projects including serverless applications, automated backup systems, and CI/CD pipelines

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, Lambda, VPC, CloudWatch, Auto Scaling, RDS, Redshift)
- **DevOps Tools:** Git, GitHub, CI/CD Pipelines, AWS CodePipeline, CodeBuild
- **Containers & Orchestration:** Docker, Kubernetes
- **Infrastructure & Automation:** Terraform (IaC), Serverless Architecture, Backup Automation
- **Monitoring & Logging:** AWS CloudWatch (Logs, Metrics, Alerts)
- **Databases:** Amazon RDS, Amazon Redshift
- **OS & Networking:** Linux Basics, Networking Fundamentals (TCP/IP, DNS, HTTP)

PROJECTS

Serverless Image & Video Processing System

- Designed a serverless architecture using AWS S3, Lambda, and IAM
- Automated media processing using event-driven S3 triggers
- Eliminated manual intervention and improved processing efficiency by ~70%

Automated EBS Snapshot Backup & Cleanup

- Developed a Lambda-based solution to automate EBS snapshot creation and deletion
- Scheduled backups using CloudWatch Events for regular data protection
- Optimized storage usage by implementing automated snapshot lifecycle cleanup

Real-Time Data Processing Pipeline

- Built a real-time data pipeline using Kinesis, Lambda, S3, and Redshift
- Processed streaming IoT data and stored it for analytics
- Implemented an end-to-end ETL workflow for real-time insights

2-Tier Web Application Deployment

- Deployed a scalable web application using EC2 and RDS
- Configured VPC, subnets, and security groups for secure communication
- Ensured high availability and fault tolerance through proper architecture design

Auto Scaling & Load Balancer Setup

- Configured Auto Scaling Groups to dynamically adjust resources based on demand
- Integrated Elastic Load Balancer to distribute traffic efficiently
- Improved system availability and performance under varying workloads

“Completed 15+ hands-on AWS & DevOps projects (more available on GitHub)”

STRENGTHS

- Strong analytical and problem-solving skills
- Quick learner with hands-on project experience
- Ability to design scalable and reliable cloud systems
- Self-motivated and continuous learner

EDUCATION

Master of Science in Geology

University of Mysore

Aggregate CGPA - 7.88

02/2022 – 10/2025

Mysore

Bachelor of Science in CBG (Chemistry, Botany, Geology)

Yuvaraja's College Mysore

Aggregate CGPA - 7.0

06/2018 – 10/2021

Mysore

LANGUAGES

- English
- Kannada

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.

CERTIFICATES

- AWS Certified Cloud Practitioner
- DevOps Training Certification
– **Basent Technologies**
